

## NEW PROPANE EQUIPMENT INSTALLATIONS

At Buckley Heating & Cooling, we encourage our customers to consider green options when choosing propane for your home energy source. Clean-burning and highly efficient, a propane heating system can help you save significantly on heating costs and promote energy conservation. New heating system models can offer **efficiency ratings of up to 97%**! Buckley Heating & Cooling offers free tank installations as well! Save on energy and related costs this heating season with a propane system upgrade!

## WHY BUCKLEY HEATING & COOLING?

- Fully staffed service department operates 24 hours a day, seven days a week including holidays for your convenience
- Uninterrupted propane deliveries throughout any weather condition or unforeseen industry interruption
- Propane storage facility keeps energy flowing
- Friendly customer service to better serve you

**Rest Assured**

## SAFETY INSPECTION

Our technicians will conduct a safety inspection of your generator system based on manufacturer's recommendations and best practices.

## ANNUAL PREVENTIVE MAINTENANCE

The annual preventive maintenance process will assure that your system is ready when you need it. This will also help extend the life of your investment.

## SYSTEM TRANSFER INSPECTION

We will check the transfer system at the time of the preventive maintenance to be sure you will have electricity from your generator when the power goes out.

## 10% PARTS & LABOR DISCOUNT

Parts and labor will be discounted at 10% for all generator services not fully covered under this agreement.

## PRIORITY SERVICE

Our preventive maintenance plan customers receive priority service over all other service requests.
